TECHNICAL SKILLS

Front-end: CSS, HTML, JavaScript, React.js, Angular, TypeScript, React Native, jQuery, HighCharts, PHP, Bootstrap, Sass, Expo

Back-end: Node.js, Express.js, Webpack, Babel, WordPress, Netlify, Heroku, MySQL, Apache Beam API

Tools: Git/GitHub, Chrome DevTools, Figma, Fiddler, Excel, TortoiseSVN, Jira, Agile/Scrum, Postman

RELEVANT EXPERIENCE

InvestCloud, Inc. | Front-End Engineer

April 2023–Present

- Develop complex product extensions and maintain strong communication with team members on potential blockers
- Interpret error messages provided by **Chrome DevTools**, **ASP.NET**, and internal applications, then quickly identify solutions
- Provide support in troubleshooting bugs and determining software fixes to limit and reduce excessive developer downtime
- Collaborate with Product Solutions Architects and Internal Product Owners to scope out optimal build approaches

InvestCloud, Inc. | Junior Front-End Developer

May 2021–April 2023

- Built full-stack financial technology apps using **HTML/CSS**, **Apache Beam API**, and proprietary software
- Utilized technical and creative problem-solving to implement long-term solutions to proprietary software limitations
- Ensured all development follows **Agile** methodology and supports mobile, dark mode, ADA, and cross-browser capabilities
- Collaborated with colleagues to streamline mentoring of junior developers in best practices of development and productivity

SOFTWARE APPLICATIONS

Professional Website | molfuh.dev

Digital portfolio designed to showcase own software engineering projects

- Built personal website using **React** with **NPM packages** to ensure flexibility and to efficiently display modern web effects
- Ensured clean and readable code by utilizing **React Hooks** and **React styled-components** throughout the application
- Launched site with **Google Domains** in conjunction with **Netlify** to streamline releases with new changes

Positively TEDIOUS | positivelytedious.com

Portfolio website for new musician TEDIOUS to showcase important artist information (includes hidden surprise behind logo)

- Created an interactive and dynamic one-page web application using **React** to fulfill artist's vision and requests
- Leveraged **Sass** preprocessor to optimize clean code base, separating CSS into separate sheets based on function and purpose
- Utilized **CSS animations** with **keyframes** to present a unique and seamless user experience across all devices

INT Magazine | intmagazine.netlify.app

Online magazine highlighting creative themes and topics

- Built original site using **PHP** with **Wordpress** as CMS to ensure independent client use following development
- Composed original **PHP functions** to customize the experience of users uploading content through the Wordpress portal
- Designed website using **Figma** and actively implemented client feedback before and during development phase

ADDITIONAL EXPERIENCE AND EDUCATION

Hack Reactor @ Galvanize | Advanced Software Engineering Immersive Program

2021

Galvanize Full-Tuition Scholarship • Web Accessibility Presentation

Brookdale Hospice | Music Therapist

2019–2020

"Everyday Hero" Employee-Nominated Award (2019)

University of the Pacific | Bachelor of Music in Music Therapy

2014–2018

Magna Cum Laude • Pi Kappa Lambda National Music Honor Society
